

Portage Mutual Building

The truck in the building is a 1938 Ford which was used by the Portage Mutual Insurance Co. to go around Southern Manitoba doing insurance assessments and repairs. Various other artifacts line the shed, including a combination washer/dryer machine, drill presses, old gas pumps, oil cans, old licence plates with the tabs which were added each year, tire pumps, boat motors, pulleys, grinders for sharpening tools, an assortment of tools, an early snowblower and a pump for pumping water out of a boat or basement.
